

SECHRIST CHAMBER CLEANING SYSTEM

P/N 20644 CHAMBER CLEANING KIT (56"-100")
P/N 20644-1 CHAMBER CLEANING KIT, SHORT HANDLE (38"-68")

PRODUCT FEATURES

The Sechrist Cleaning System increases convenience and efficiency which is key to improving your hyperbaric team's experience maintaining your Sechrist Hyperbaric Chamber. As opposed to more traditional hyperbaric chamber cleaning methods, where a team member has to climb all the way into the chamber to get to hard-to-reach places, the new Sechrist Chamber Cleaning System helps you reach all parts of the chamber easily and this, in turn, works by increasing infection control. This is a win for convenience and efficiency for your hyperbaric staff. Cleaner and Quicker is our mantra.

Each Cleaning Kit comes with the following:

- One telescoping pole;
- Wall mounting bracket;
- One rigid mop 9" head frame and connector (for flatter surfaces and end cap);
- One flexible mop 17.5" head frame and connector (for curved surfaces);
- One Pack (Qty: 20) of 17.5" disposable cleaning cloths, and
- One Pack (Qty: 20) of 9" disposable cleaning cloths.

FOR DISPOSABLE CLEANING CLOTH REFILLS, USE BELOW PART NUMBERS:

P/N 75135-1: 17.5" Disposable Cleaning Cloths - Pack of 20

P/N 75135-2: 9" Disposable Cleaning Cloths - Pack of 20
