

SECHRIST MEDICAL GAS DESIGN & INSTALLATION

Sechrist Industries is now providing a comprehensive suite of services for Medical Gas for both Oxygen or Air supply and distribution systems tailored specifically for Sechrist monoplace hyperbaric oxygen chambers. These services include Medical Gas supply consulting, design, installation advisory oversight, post-installation verification/certification, and maintenance coordination. Our seasoned team is recognized for their economical and code-compliant approach to the design and installation of hyperbaric oxygen Medical Gas supply and distribution systems, consistently demonstrating excellence in the field.

MEDICAL GAS CONSULTING SERVICES

- » Design, Provide, Install & Certify Medical Gas system source equipment for either Medical Oxygen or Medical Air, as applicable, for:
 - Hospitals
 - Skilled Nursing and Long Term Care Facilities
 - Surgery Centers
 - Medical Clinics
 - Veterinary Clinics
- » Identification of appropriate Medical Gas supply source type, either Medical Oxygen or Medical Air, for both Sechrist monoplace hyperbaric chamber and patient breathing gas.
- » Design of Medical Gas distribution system from source to point of use.
- » Mobile and modular gas supply systems for specialized applications and medical practices.
- » Medical Gas supply site selection, and space planning.
- » Independent third party systems certifications.
- » Coordination of annual systems inspections.
- » Coordination of systems maintenance & repair.
- » Consult on selection of Medical Gas supplier including review and comment on gas supplier agreements.

EQUIPMENT & INSTALLATION COST ESTIMATES

A multitude of factors significantly influence the total cost of acquiring and installing either a bulk or VGL (variable gas liquid) Medical Oxygen supply or Medical Air compression system.

Sechrist aids clients in:

- Identifying and estimating the costs of tailored Medical Gas solutions.
- Acquisition, installation, and certification of both primary and reserve Medical Gas supplies for both Oxygen and Air, including associated equipment and distribution systems.
- Budgeting considerations encompassing design, permitting, site development, electrical power, taxes, shipping, and other related expenses.

All design schematic fees will be applied towards the medical gas system installation when Sechrist conducts the installation.
