

Sechrist Industries, Inc., the world leader in Hyperbaric technology, continues to innovate and look at solutions to make it easier to operate our monoplace hyperbaric chambers. Our newest value-added accessory, the Sechrist Mirror Guidance System allows caregivers to easily connect the patient gurney to the chamber rails by allowing the user to have a clear view of the foot of the chamber at all times.

MIRROR GUIDANCE SYSTEM BENEFITS

- Allows chamber operators to visually locate both the foot end of the gurney and the chamber rails while standing at the head end of the gurney.
- Reduces time confirming alignment and reduces “feathering” effect to repeatedly raise and lower the gurney to meet height of chamber rails.
- Reduces potential damage to door gasket as a result of misalignment due to limited visualization.
- Mirror is easily adjustable to find the perfect angle for alignment and viewing.

Close up of caregiver's view of the end of the gurney and the interior chamber rails.

PART NUMBER - P/N 20612

Available for all 3200/R, E Chambers and H Chambers
