

AUTOMATIC GURNEY MECHANICAL HEIGHT STOP

Sechrist's new Automatic Gurney Mechanical Height Stop Kit will allow users to always stop the Hyperbaric Gurney to meet the Chamber rails at exactly the right height everytime.

PRODUCT FEATURES:

Efficiency and simplification of patient treatments not only enhances the patient experience but also improves the process for the hyperbaric technician.

Features of the Automatic Gurney Mechanical Height Stop

- Allows for the gurney rails height to be set to always stop at the exact height of the chamber rails
- Reduces the need to continually check to see if the rails are aligned
- No longer requires 'feathering' of the gurney height which can lead to stretcher plate becoming uneven
- Difficulty in lining up gurney to chamber is eliminated
- Minimizes damage to chamber and door gasket when aligning

Available as an upgrade to most Sechrist Low Profile Hyperbaric Gurneys. Can be conveniently installed at the time of Annual Service. Contact Sechrist Industries for additional information and scheduling.
