

PATIENT TRANSPORT STRETCHERS

PUTTING PATIENT SAFETY AND COMFORT FIRST ALWAYS

WHY SECHRIST STRETCHERS?

- + **Low-Profile stretchers for better access for patients, ensuring safety**
- + **Affordable cost so our clients get high quality stretchers at a price that works for them**
- + **Functional design with comprehensive options & accessories**

Our passionate staff works tirelessly to produce durable, high quality products with customer service to match. We create unique, user-friendly medical devices for our supply chain partners, bridging the gap between purchasers and end-users.

Why choose to partner with Sechrist? We are committed to finding the most useful, cost effective, and personalized medical devices for every customer, physician, clinician, clinic, hospital or group.

+ LOW PROFILE STRETCHERS = SAFETY

1

HELP REDUCE FALLS AND FALL-RELATED INJURIES WHILE PROMOTING MOBILITY.

Research demonstrates, a low stretcher bed height aids in reducing occurrence of falls – leading to improved patient outcomes; Most falls occurred in the patient’s room (50-85%) on or near the bed while unassisted (79%) .

2

PROMOTES SAFE PATIENT HANDLING AND REDUCTION IN FALL-RELATED INJURIES FOR ALL PATIENT CARE ENVIRONMENTS.

Each year, up to 1,000,000 patients in the US experience a fall while being treated in the hospital; more than one-third of falls in hospitals can be prevented.

3

LOWER HEIGHT, ELEVATED STANDARD OF CARE

Research demonstrates a clear correlation between low stretcher bed height and the reduced occurrence of falls – as well as reduced injuries from falls – all of which lead to better patient outcomes.

With its low height and ergonomically designed features, Sechrist stretchers promote safe patient handling and reduction in fall-related injuries for all patient care environments.

4

FALL & INJURY PREVENTION

PROBLEM: Approximately one third of stretcher bed falls lead to patient harm with 4-6% of those resulting in serious injury. This makes it very important for adjustable height stretchers to be used in order to avoid these falls.

5

SOLUTION

Providing optimum ergonomic stretcher bed siderail design facilitates safe mobility practices for both the patient and the caregiver by providing accessible grab points that serve as a patient aid to facilitate mobility tasks, such as supine to sit and sit to stand.

Achieving a low bed position is important and was designed to help reduce the severity of injuries when patients fall from bed.

IMPORTANCE OF TRANSPORT LOW PROFILE STRETCHERS

- Ability to achieve a very low position, which can reduce the potential severity of injury if a patient were to roll or fall off the stretcher
- Ability to achieve optimum stretcher egress height and position for each individual patient

+ SECHRIST LOW PROFILE TRANSPORT STRETCHER

+ FEATURE OVERVIEW

Sechrist has now introduced its unique, Low Profile Transport Stretcher into the marketplace. This new product offers a variety of features and benefits that will meet the needs of your patients and team.

33" maximum stretcher height with mattress

Less than 21" low height with mattress

- Low Profile Transport Stretcher is lower from floor to top of mattress compared to other standard transport stretchers in the market allowing for maximum patient comfort and safety.
- Eliminates or minimizes the use of step stools and staff assistance which potentially results in easier and safer patient access to getting onto the Transport Stretcher.
- Adjustable backrest has an increased incline up to 90° for additional flexibility and patient comfort.
- The low profile hydraulic transport stretcher provides for easy loading of the patient onto other beds / chairs without additional transfers.
- IV-Pole, O2 Tank Holder and other accessories are available.

Adjustable Side Rails

Fitted Oxygen Tank Holder

Back Rest goes up to 90°

Hydraulic Foot Pedal

One Step Locking Mechanism on all Four Sides

+ SECHRIST LOW PROFILE TRANSPORT STRETCHER

+ FEATURE OVERVIEW

Sechrist Transport Stretchers offer considerable flexibility, easily adjusting to various heights for ready access to patients in beds, wheelchairs or other elevations.

- Sechrist Low Profile Hydraulic Transport Stretcher adjusts lower than other standard transport stretchers allowing for maximum patient comfort and safety.
- Designed exclusively for Sechrist allowing for easy transferring of patients on to and off of Sechrist Transport Stretchers.
- One step locking mechanism located on all four sides of the Transport Stretcher ensures simultaneously locking of all wheels for safety.
- Added features include side rails for patient protection, IV pole, storage tray and gas cylinder holder.
