Sechrist Industries, the world's leader in hyperbaric oxygen chambers, is always evaluating new innovations in order to make things easier for patients and caregivers alike.

The NEW Sechrist Industries E-Gurney™ Electric Wheeled Stretcher, provides an easier way to allow the caregiver to manage the patient on the gurney. With automated raising, lowering and braking, you simplify the manual process.

E-Gurney Electric Wheeled Stretcher Unique Features

• Dual Integrated Automatic Foot Pedals for effortless raising and lowering
• Steering and Stability with electronic controlled action
• Effortless Braking with responsive one step paddle system
• Lead Acid Rechargeable Battery extends run time between charging
• Electronically Actuated Columns provide synchronized raising and lowering
• Memory Height Setting Button for precise alignment with the chamber
• Unique Low-Profile Design allowing easier patient access onto the E-Gurney
• Comprehensive Service Programs available to protect your investment

Specifications - P/N 20582
